

# DUST CONTROL SYSTEMS

The best tools, vacuums, and dust removal accessories to help clear the air, add productivity on the jobsite and help meet OSHA 1926.1153 Table 1 compliance.

APPLICATION	TOOLS AND VACUUMS														DUST CONTROL ACCESSORY									
SDS+ DRILLING / CHISELING	Rotary hammers - Cordless				Rotary hammers - Corded					Universal vacuum cleaners					Hollow drill bit		Dust removal system

1 Hilti's manufacturer guidelines state that the VC-75-1-A22 can be used for cleaning and drilling extraction for TE-C drills (SDS-Plus) and TE-Y (SDS-Max). When used with the DRS-D with a SDS-Max tool, the VC-75 can be used for dust collection when drilling diameters up to 32 mm (1.25") on wall and floor applications.  
 2 The published item numbers here will provide OSHA 1926.1153 Table 1 compliant solutions. Previous generations will still need to utilize the objective data test report. Call Hilti for additional questions.  
 3 Hilti interprets a core drill as also being a OSHA 1926.1153 Table 1 (vi) "drill", and therefore DD 110 and DD 150 and/or other hand held core drills are compliant when used with a shroud and dust collection system.  
 4 Hilti interprets these tools as large handheld angle grinders, which would therefore place them in OSHA 1926.1153 Table 1 section iii). These tools are OSHA 1926.1153 Table 1 compliant ONLY when used with the VC 300-17 X. However, you can use Hilti's objective data test report when using the VC 150 vacuums.  
 5 OSHA 1926.1153 Table 1 engineering control method as specified in 29 CFR 1926.1153. Core drills under OSHA 1926.1153 Table 1 (vi) "rig mounted core drills" are compliant when stand-mounted and used with a water delivery system.
